Specialità:

Attrezzatura:

Corde: 2x40m (2x30m)

Sintesi: (traduzione alternativa)

Beautiful vegetated and water-bearing canyon; first part open, second part cut; escape possibilities in the first part or before the 30m final waterfall on the left; belays are already a bit older but sufficient; longer car overpass; beautiful cavities, sintering and stalactites in the second part; cold water; large catchment catchment area.

Idrologia:

Accesso: (traduzione alternativa)

approx. parking exit 40min/ parking entry 1h10min

From Podgorica direction north (Kolašin) along the Morača. Directly after the 9th tunnel (9th tunnel = very short) the shuttle car is parked on the right at the turnout at Km 1012. With the 2nd car you drive a short distance to the north. After the village sign Trmanje directly after the bridge one turns left into the small inconspicuous exit. Follow the narrow mountain road for 5 km. Then you turn left into a forest road (ground clearance for cars!). Follow the forest road to the right until you reach an open area (small wooden hut).

Avvicinamento: (traduzione alternativa)

approx. 30min

From the parking lot, follow the forest road back briefly and continue downhill to the stream. From here, follow the path/stream to the left. After crossing the stream several times, you will come across an old overgrown mill house at about 350m. This is also the entry point.

Giro: (traduzione alternativa)

ca. 2,5h

Bogutovski Potok is a beautiful canyon rich in vegetation with mostly shorter rappels. The first part is still open. Here some steps can be downclimbed/ bypassed. After the first higher rappelling point (about 25m) you can already see into a deep canyon. Here begins the most beautiful part of the canyoning tour. Several short abseils with possible jumps lead through the gorge, which is partly decorated with sintering. Shortly before the bridge at approx. 170m you can leave the canyon to the left or you can choose the last and highest rappel of approx. 30m in the water course under the bridge. The last rappel ends in the Morača at about 120m.

Ritorno: (traduzione alternativa)

approx. 15min

First exit possibility: before the bridge on the left at about 170m.

Second exit: after the 30m rappel at approx. 120m, follow the river on the right for approx. 100m. Here a small inconspicuous steep path leads directly up to the road (tunnel with Km. limit). In a short time you are at the exit parking lot.

The first third is a struggle, 1h walk in the almost dry stream bed, luckily not that overgrown as expected. Beware of snakes, there were a lot, some looking wicked. The second third is a nice, shady forest, but still dry. Then comes the canyon, cold water enters suddenly, even some - literally - cool jumps are possible. Here you definitely need the wetsuite. The travertine formations are amazing. Exit option before the last 2 rappels (at the bridge) is quite obvious. If done till the Moraca a bit of free climb is required (15-20m, easy). However, the rating here is misleading: no V4 but V2 instead (all rappels are simple). And we spent 4h the canyon, with decent pace, can't imagine that in the stated 2:30h.

The upper parking lot is where the zig-zag slope starts (the beginning would still be rideable up to the 1st hairpin, but not after that). At the last hairpin before the stream, be sure to turn left down the slope. Then you can follow a small path, sometimes left, sometimes right, which is already somewhat overgrown and thorny (wear neoprene at the bottom), until you prefer to walk along the stream rather than continue through the undergrowth (45 minutes from the road). You have to be patient, because the canyon only becomes beautiful where it is cut deep, but then it is very beautiful until the end. (traduzione alternativa)
